

UNIVERSITY OF KUOPIO

# Bi oMater Centre

<http://www.uku.fi/biomater>

## *biomechanics*

## *spectroscopy*

- BioMater-Centre was founded in 2000 to coordinate and enhance projects in materials research at the University of Kuopio. The Centre is co-operating with several researchers from different departments, companies and research organisations. Since 2005 the Centre is regarded as an independent department at the University of Kuopio

## *simulation*

## *microscopy*

- Companies and research groups can carry out their own analysis using the equipment available at the Centre or they can rely on the experts actively using these techniques. More extensive co-operation is possible in joint projects.

## *biocompatibility*
