## Drug Synthesis II, 2012, Homework 4

Name\_\_\_\_\_

(1) Suggest a mechanism for this synthesis of a tricyclic aromatic heterocycle. (4p)

$$NH_2$$
 +  $NH_2$  +  $NH_2$  +  $NH_2$  +  $NH_2$  +  $NH_2$ 

(2) Suggest syntheses for single enantiomers of these compounds. (6p)
